

xm radio is a service that people pay for, we should get to decide what we hear. my friends & family all enjoy XM & the services they provide. on my local radio stations i only enjoy 3 radio stations that have talky DJs, bad music, & poor quality. with XM i have 3 stations that play only the stuff i like (making it hard to decide) and then 3 stations that play stuff i often like. plus the DJs are cool & it sounds great. almost any person that tries XM gets hooked & cant go back. if you want to know the easy decision, try xm yourself. then decide. I urge you to reject the NABs pentition 04-160 and support XMs ability to provide the kind of programming that we deserve.
